Coordinators Column

The theme of this month's column is good news/bad news. Let's get to it!

**Good news**
- seeing a lot of brand new Docents doing (leading) our programs. It is great that you (they) are jumping right in!

**Bad news**
- seeing a lot of brand new Docents doing (leading) our programs. Where are all the veteran Docents they are supposed to be shadowing?

**Upshot**
- Hey all you veteran Docents - THIS IS OUR BUSIEST TIME! WE NEED YOU!

**Good news**
- we built 6 new Oyster River Cats in May! Ray and Lindsay are retiring, but a crack team of new Docents are taking on program leadership!

**Bad news**
- it was a struggle to get the 6 families.

**Upshot**
- please start NOW mentioning the opportunity to any and all you know who might be interested.
Good news - the House Appropriations Committee

Bioluminescence -The Light of the Oceans
Upwards of 90% of deep marine life is estimated to produce light. This talk will explore the how, where and why this happens.

Wednesday,
June 25th at 10:00 AM at the MDC.
Presented by Skip Small.
Sign-up at online calendar.
