Coordinators Column

Stepping up, stepping down, stepping in, and stepping out - we hear those expressions all the time, and we all have our own understanding of what they mean. Today I would like to speak about 'stepping up" and what it means for us. There is no question that the Docent program would not function without volunteers stepping up to take on leadership roles within the program. These volunteer "managers" take on responsibilities that allow activities to happen that otherwise might not, and by doing so become critical linchpins for the program. Examples include all the program leaders, committee leaders, and informal "get-it-done" Docents that own some part of what we do.

But why do we need them? There's a staff isn't there? Yes, there is, but like most educational endeavors Click Here for the rest of the column.

Mark
Volunteers needed for this event formally known as Know the Coast Day. This event is a month and a half away!

We will need many volunteers for these two days. Please let us know if you can help!

Thank you!
